

# Background suppression sensor RL28-8-H-2000-IR/47/73c

- Ultra bright LEDs for power on and switching state
- Minimal black-white difference through the infrared transmission
- Not sensitive to ambient light, even with energy saving lamps
- Waterproof, degree of protection IP67
- Protection class II

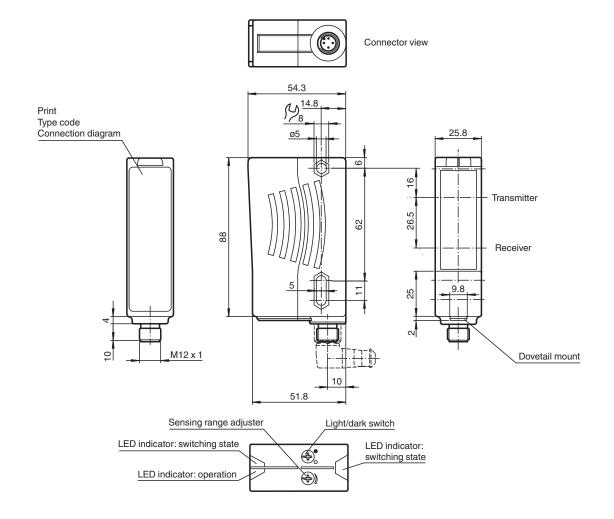

Background suppression sensor

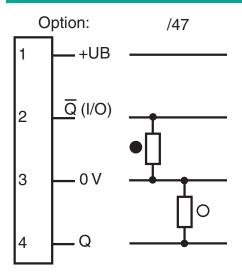

### **Dimensions**

#### Technical Data **General specifications** 20 ... 2000 mm Detection range Detection range min. 20 200 mm Detection range max. 20 ... 2000 mm Background suppression max. + 10 % of the upper limit of the detection range Light source Light type modulated infrared light, 880 nm Black-white difference (6 %/90 %) < 40 % Diameter of the light spot approx. 70 mm at a distance of 2000 mm Angle of divergence transmitter 2° receiver 2 50000 Lux Ambient light limit Functional safety related parameters $\mathsf{MTTF}_\mathsf{d}$ 720 a Mission Time (T<sub>M</sub>) 20 a Diagnostic Coverage (DC) 0% Indicators/operating means Operation indicator LED green Function indicator 2 LEDs yellow ON: object inside the scanning range OFF: object outside the scanning range Control elements Sensing range adjuster, Light-on/dark-on changeover switch **Electrical specifications** Operating voltage $U_{\mathsf{B}}$ 10 ... 30 V DC 10 % Ripple No-load supply current < 40 mA $I_0$ Output Switching type light/dark on switchable Signal output 2 PNP, complementary, short-circuit protected, reverse polarity protected , open collectors Switching voltage max. 30 V DC Switching current max. 200 mA 250 Hz Switching frequency f Response time 2 ms Conformity Product standard EN 60947-5-2 Approvals and certificates Protection class II, rated voltage ≤ 250 V AC with pollution degree 1-2 according to IEC 60664-1 **UL** approval E87056, cULus Listed, class 2 power supply, type rating 1 **Ambient conditions** -40 ... 60 °C (-40 ... 140 °F) Ambient temperature -40 ... 75 °C (-40 ... 167 °F) Storage temperature Mechanical specifications Housing width 25.8 mm Housing height 88 mm 54.3 mm Housing depth Degree of protection **IP67** Connection 4-pin, M12 x 1 connector Material Housing Plastic ABS Optical face plastic Connector plastic Mass 70 g

## **Connection Assignment**

- O = Light on
- = Dark on

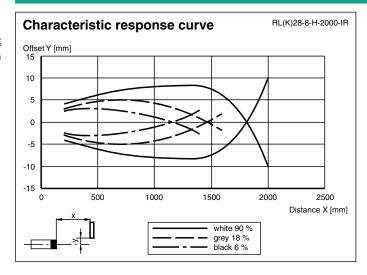

### **Connection Assignment**

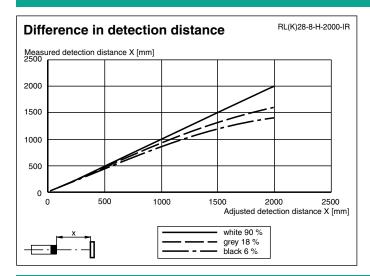

Wire colors in accordance with EN 60947-5-2

1 BN (brown) 2 WH (white) 3 BU (blue) 4 BK (black)

### **Characteristic Curve**

### **Application**

Α					

0.	OMH-05	Mounting aid for round steel ø 12 mm or sheet 1.5 mm 3 mm
	OMH-21	Mounting bracket: mounting aid for sensors in the RL* series
	OMH-22	Mounting aid for RL* series
	OMH-RLK29-HW	Mounting bracket for rear wall mounting
	OMH-RL28-C	Weld slag cover model

#### **Additional information**

#### Intended use:

The transmitter and receiver are located in the same housing for direct detection sensors with background masking. Marking of objects outside the detection range is achieved by arranging the angle between the transmitter and receiver (2 receiver

Objects are detected independently of their surface structures, brightness and colour, as well as the brightness of the background.

#### Mounting instructions:

The sensors can be fastened directly with fixing screws or with a support bracket (not included with delivery).

The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nut and screw in place with spring washers to prevent the sensor from going out of adjustment.

#### Adjustment:

After the operating voltage is applied, the LED is lit green.

Align the sensor to the background. If the yellow LED is lit, the detection range should be reduced with the detection range adjuster until the yellow LED goes out.

#### Object direction:

Place the object to be detected at the desired maximum detection range and align the light spot to it. If the object is detected, the yellow LED lights up.

If it does not light up, the detection range must be adjusted on the potentiometer until it lights up when an object is detected. Cleaning:

We recommend cleaning the optical surface and checking the screwed connection and other connections at regular intervals.
