Control interface unit IDENTControl with DeviceNet interface

Function

The innovative concept of the RFID identification system IDENTControl from Pepperl+ Fuchs has many advantages in comparison to other systems. The core piece of the system is the evaluation unit IDENTControl.
Thanks to the integrated interfaces for all standard field bus systems such as PROFIBUS, EtherNet, PROFINET IO, DeviceNet, serial connections (RS 232/RS 485/RS 422) and numerous connection options for inductive write/read heads as well as microwave antennas, the evaluation unit IDENTControl can be adjusted to your needs in a flexible and easy manner.
LEDs indicate operating power and bus communication, connected write/read heads and active write/read commands.
Mounting the unit onto DIN mounting rails is easy thanks to the snap-fits on the back of the housing of the evaluation unit IDENTControl .
With its L-shaped housing, the evaluation unit including bus connector fits into a 120 mm grid in the switch cabinet. The mounting depth of 70 mm furthermore enables installation in flat switch boxes with a depth of only 100 mm.
There are 3 further mounting holes for field mounting.
