

## Triangulation sensor (BGS) OBT80-R103-2EP-IO-0,3M-V1-L

- Miniature design with versatile mounting options
- DuraBeam Laser Sensors - durable and employable like an LED
- Extended temperature range  
-40 °C ... 60 °C
- High degree of protection IP69K
- IO-Link interface for service and process data

Triangulation sensor with background suppression

**IO-Link**

### Function

The R103 series miniature optical sensors are the first devices of their kind to offer an end-to-end solution in a small single standard design — from thru-beam sensor through to a distance measurement device. As a result of this design, the sensors are able to perform practically all standard automation tasks.

The entire series enables sensors to communicate via IO-Link.

The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor.

The use of Multi Pixel Technology gives the standard sensors a high level of flexibility and enables them to adapt more effectively to their operating environment.

**Dimensions**

**Technical Data**

| <b>General specifications</b>               |   |
|---|---|
| Detection range                             | 7 ... 80 mm   |
| Detection range min.                        | 7 ... 25 mm   |
| Detection range max.                        | 7 ... 80 mm   |
| Adjustment range                            | 25 ... 80 mm  |
| Reference target                            | standard white, 100 mm x 100 mm                       |
| Light source                                | laser diode   |
| Light type                                  | modulated visible red light                           |
| Laser nominal ratings                       |   |
| Note  | LASER LIGHT , DO NOT STARE INTO BEAM                  |
| Laser class                                 | 1   |
| Wave length                                 | 680 nm  |
| Beam divergence                             | > 5 mrad d63 < 1 mm in the range of 150 mm ... 250 mm |
| Pulse length                                | 3 μs  |
| Repetition rate                             | approx. 13 kHz  |
| max. pulse energy                           | 10.4 nJ   |
| Black-white difference (6 %/90 %)           | < 5 % at 60 mm  |
| Diameter of the light spot                  | approx. 1 mm at a distance of 60 mm                   |
| Opening angle                               | approx. 0.3 °   |
| Ambient light limit                         | EN 60947-5-2 40000 Lux                                |
| <b>Functional safety related parameters</b> |   |
| MTTF <sub>d</sub>                           | 560 a   |

|  | <b>IO-Link-Master02-USB</b> | IO-Link master, supply via USB port or separate power supply, LED indicators, M12 plug for sensor connection |

Release date: 2023-03-28 Date of issue: 2023-03-28 Filename: 267075-100290\_eng.pdf

## Configuration

- 1 - Light-on / dark-on changeover switch
- 2 - Sensing range / sensitivity adjuster
- 3 - Operating indicator / dark on
- 4 - Signal indicator
- 5 - Operating indicator / light on

To unlock the adjustment functions turn the sensing range adjuster / sensitivity adjuster for more than 180 degrees.

### Sensing Range/ Sensitivity

Turn sensing range / sensitivity adjuster clockwise to increase sensing range / sensitivity.

Turn sensing range / sensitivity adjuster counter clockwise to decrease sensing range / sensitivity.

If the end of the adjustment range is reached, the signal indicator starts flashing with 8 Hz.

### Light-on / Dark-on Configuration

Press the light-on / dark-on changeover switch for more than 1 second (less than 4 seconds). The light-on / dark-on mode changes and the operating indicators are activated accordingly.

If you press the light-on / dark-on changeover switch for more than 4 seconds, the light-on / dark-on mode changes back to the original setting. On release of the light-on / dark-on changeover switch the current state is activated.

### Restore Factory Settings

Press the light-on / dark-on changeover switch for more than 10 seconds (less than 30 seconds) until all LEDs turn off. On release of the light-on / dark-on changeover switch the signal indicator turns on. After 5 seconds the sensor resumes operation with factory default settings.

After 5 minutes of inactivity the sensing range / sensitivity adjustment is locked. In order to reactivate the sensing range / sensitivity adjustment, turn the sensing range / sensitivity adjuster for more than 180 degrees.
