# Inductive sensor
NRB20-L3-E2-IO-V1

- ■ 20 mm flush
- ■ Reduction factor = 1
- ■ Magnetic field resistant
- ■ IO-Link interface for service and process data
- ■ Switch point mode or window mode can be set
- ■ Switching function, stability alarm and pulse extension can be set
- ■ 4-way LED indicator
- ■ Quick mounting bracket

CE c(UL)us UKCA IO-Link □

Function

Reduction factor 1 sensors reliably detect different metals with the same switch state.
The integrated IO-Link interface enables clear identification of the sensor and diagnosis of the sensor condition. When using the sensor, parameters and operating modes can be optimally configured specifically for the intended application. In addition to setting the switching function and a pulse extension, the user can select either switch point mode or window mode in combination with a stability alarm.
In switch point mode, the stability alarm signals the detection of an object in the area between the assured operating distance and operating distance sn. In window mode, it signals the detection of an object below the window between operating distance sn and the nearest operating distance. A stability alarm is displayed to the user via a flashing LED and process data.

General specifications

Switching function		Normally open/closed (NO/NC) programmable
Output type		PNP
Rated operating distance	s_n	20 mm (factory setting)
Near operating distance		15 mm (can be activated by software)
Installation		flush
Output polarity		DC
