

Background suppression sensor RL28-8-H-400-IR/49/115

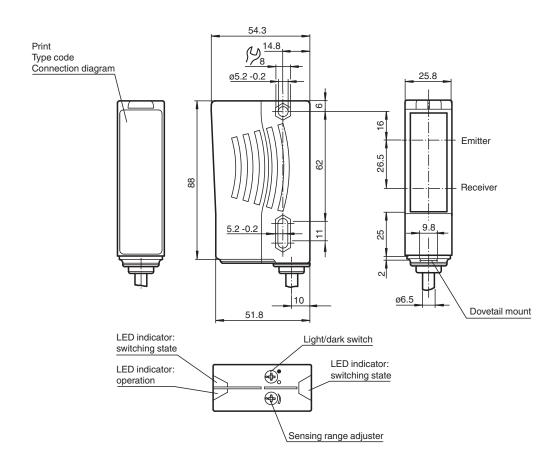

- Ultra bright LEDs for power on and switching state
- Minimal black-white difference through the infrared transmission
- Not sensitive to ambient light, even with energy saving lamps
- Waterproof, degree of protection IP67
- Protection class II

Background suppression sensor

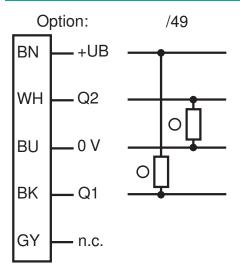

Dimensions

Technical Data

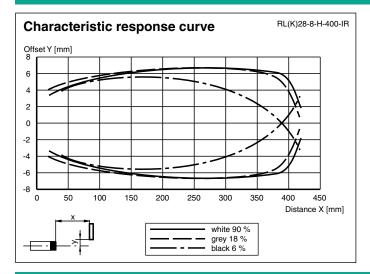

General specifications 20 ... 400 mm **Detection range** Detection range min. 20 ... 150 mm 20 ... 400 mm Detection range max. Background suppression max. + 10 % of the upper limit of the detection range Light source Light type modulated infrared light, 880 nm Black-white difference (6 %/90 %) < 5 % Diameter of the light spot approx. 14 mm at a distance of 400 mm Angle of divergence transmitter 2° receiver 2 50000 Lux Ambient light limit Functional safety related parameters MTTF_d 720 a Mission Time (T_M) 20 a Diagnostic Coverage (DC) 0% Indicators/operating means Operation indicator LED green Function indicator 2 LEDs yellow ON: object inside the scanning range OFF: object outside the scanning range Control elements Sensing range adjuster, Light-on/dark-on changeover switch **Electrical specifications** Operating voltage U_{B} 10 ... 30 V DC 10 % Ripple No-load supply current < 40 mA I_0 Output Switching type light/dark on switchable Signal output 1 NPN, 1 PNP synchronized-switching, short-circuit protected, reverse polarity protected, open collectors Switching voltage max. 30 V DC Switching current max. 200 mA 250 Hz Switching frequency f Response time 2 ms Conformity Product standard EN 60947-5-2 Approvals and certificates **EAC** conformity TR CU 020/2011 Protection class II, rated voltage ≤ 250 V AC with pollution degree 1-2 according to IEC 60664-1 **UL** approval E87056, cULus Listed, class 2 power supply, type rating 1 **Ambient conditions** Ambient temperature -40 ... 60 °C (-40 ... 140 °F) Storage temperature -40 ... 75 °C (-40 ... 167 °F) **Mechanical specifications** Housing width 25.8 mm 88 mm Housing height Housing depth 54.3 mm Degree of protection IP67 Connection 2500 mm fixed cable Material Plastic ABS Housing Optical face plastic Mass 70 g

Connection Assignment

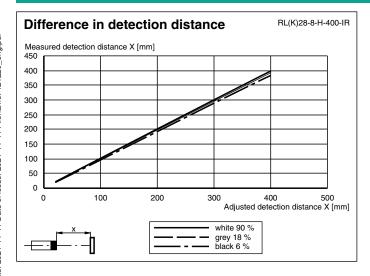

- O = Light on
- = Dark on

Additional information

Intended use:

The transmitter and receiver are located in the same housing for direct detection sensors with background masking. Marking of objects outside the detection range is achieved by arranging the angle between the transmitter and receiver (2 receiver

Objects are detected independently of their surface structures, brightness and colour, as well as the brightness of the background.

Mounting instructions:

The sensors can be fastened directly with fixing screws or with a support bracket (not included with delivery).

The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nut and screw in place with spring washers to prevent the sensor from going out of adjustment.

Adjustment:

After the operating voltage is applied, the LED is lit green.

Align the sensor to the background. If the yellow LED is lit, the detection range should be reduced with the detection range adjuster until the yellow LED goes out.

Object direction:

Place the object to be detected at the desired maximum detection range and align the light spot to it. If the object is detected, the yellow LED lights up.

If it does not light up, the detection range must be adjusted on the potentiometer until it lights up when an object is detected. Cleaning:

We recommend cleaning the optical surface and checking the screwed connection and other connections at regular intervals.
