

## DC/DC Converter PS1000-D2-24.10

- 24 V DC input
- Isolated output 24 V DC, 10 A, 240 W
- Housing width 42 mm
- Efficiency up to 94.2 %
- Minimal inrush current surge
- Reverse input polarity protection
- 20 % output power reserves

### Function

The device provides a stable, galvanically isolated SELV/PELV output voltage of 24 V DC. The device has a power reserve of 20 % included, which may even be used continuously at temperatures up to +45 °C. A reverse polarity protection prevents damage to the device caused by faulty wiring. The output voltage can be adjusted via a potentiometer. The device status is indicated by an LED. The device is mounted on a 35 mm DIN mounting rail according to EN 60715.

## Assembly

### Front view

## Installation Conditions

Mount the device on the DIN mounting rail so that the input terminals are located on the bottom of the device.

This device is designed for convection cooling and does not require an external ventilator. Do not obstruct airflow. Do not cover the ventilation grid by more than 15 %, e. g. cable ducts.

If you load the device with more than 50 % of the rated power permanently keep the following mounting distances:

- 40 mm above
- 20 mm below
- 5 mm on the left and right side

Increase this distance to 15 mm if the adjacent device is a heat source, e. g. another power supply.
