FA Technical Report

Product:	**VAZ-SW-SIMON+**
Author:	**FA-CTSS-SYS**
Document version number:	**1.0**
Date:	**2020-02-03**

Description

This version of VAZ-SW-Simon+ we offer for download is the ***Service Version*** – which means you neither can create nor modify existing ASiMon configurations.

This ***Service Version*** is intended to be used free of charge for maintenance and checking of actual state of SafetyMonitor.

You also can upload the ASiMon configuration from 1 SafetyMonitor, keep it in the memory and download it to another (e.g. replacement/spare part) SafetyMonitor to get your shut-down application running again.

That's why the "OK" button within the window "Monitor settings" is greyed out.
For the same reason the "save" and "save as.." entry in files menu is greyed out.

If you have to modify existing ASiMon configurations or create new configurations then you have to purchase the ***Full Version*** of VAZ-SW-SIMON+.

Ask your local sales contact for an offer.

Your automation, our passion.
