The device is maintenance-free. Do not use a damaged or polluted device.

Operation, Maintenance, Repair and intrinsically safe circuits according to IEC/EN 60079-14. Keep the separation distances between all non-intrinsically safe circuits observe IEC/EN 60079-14 and IEC/EN 60079-25. Associated apparatus (verification of intrinsic safety). Make sure to connecting intrinsically safe field devices with intrinsically safe circuits of apparatus with regard to explosion protection should be considered when selecting intrinsically safe field devices with intrinsically safe circuits of associated apparatus (verification of intrinsic safety). Make sure to observe IEC/EN 60079-14 and IEC/EN 60079-25.

The respective peak values of the field device and the associated apparatus with regard to explosion protection should be considered when selecting intrinsically safe field devices with intrinsically safe circuits of associated apparatus (verification of intrinsic safety). Make sure to observe IEC/EN 60079-14 and IEC/EN 60079-25.

Keep the separation distances between all non-intrinsically safe circuits and intrinsically safe circuits according to IEC/EN 60079-14.

Operation, Maintenance, Repair
Do not use a damaged or polluted device. The device is maintenance-free.

The device must not be repaired, modified or manipulated. If there is a defect, always replace the device with an original device.

Return
Take the following precautions before you return the device to Pepperl+Fuchs. Remove all adhering residues from the device. These residues can be hazardous to health. Fill in the form "Declaration of Contamination". You can find this form on the product detail page at www.pepperl-fuchs.com. Enclose the filled in "Declaration of Contamination" form with the device. Pepperl+Fuchs can examine and repair a returned device, only if a completed form is included in the return. If needed, include special handling instructions with the device. Specify the following information:

- Chemical and physical characteristics of the product
- Description of the application
- Description of the error that occurred (specify error code if possible)
- Operating time of the device

Delivery, Transport, Disposal
Check the packaging and contents for damage. Check if you have received every item and if the items received are the ones you ordered. Keep the original packaging. Always store and transport the device in the original packaging. Disposing of device, packaging, and possibly contained batteries must be in compliance with the applicable laws and guidelines of the respective country.

Improper Use
Protection of the personnel and the plant is not ensured if the device is not used according to its intended use.

Mounting and Installation
Use appropriate protection measures in order to protect persons that have contact with hazardous or toxic substances. Do not mount a damaged or polluted device. Mount the device in a way that the device is protected against mechanical hazard. Only use accessories specified by the manufacturer.

Requirements for Cables and Connection Lines
Install cables and cable glands in a way that they are not exposed to mechanical hazards. Observe the minimum bending radius of the conductors. Observe the permissible core cross-section of the conductor. Crimp wire end ferrules on the conductor ends. When installing the conductors the insulation must reach up to the terminal.

Requirements for Hazardous Area
Observe the installation instructions according to IEC/EN 60079-14. The device may be installed in gas group IIB. The device may be installed in Zone 1. The measuring equipment of device may be installed in Zone 0. If circuits with type of protection Ex i are operated with non-intrinsically safe circuits, they must no longer be used as circuits with type of protection Ex i. The respective peak values of the field device and the associated apparatus with regard to explosion protection should be considered when connecting intrinsically safe field devices with intrinsically safe circuits of associated apparatus (verification of intrinsic safety). Make sure to observe IEC/EN 60079-14 and IEC/EN 60079-25.

Keep the separation distances between all non-intrinsically safe circuits and intrinsically safe circuits according to IEC/EN 60079-14.

Intended Use
The device is only approved for appropriate and intended use. Ignoring these instructions will void any warranty and absolve the manufacturer from any liability. The device is a sensor for limit value detection of liquids in containers.

Observe laws, standards, and directives applicable to the intended use and the operating location. Observe Directive 1999/92/EC in relation to hazardous areas. The corresponding datasheets, manuals, declarations of conformity, EC-type-examination certificates, certificates, and control drawings if applicable supplement this document. You can find this information under www.pepperl-fuchs.com. Refer to the relevant EC-type-examination certificate to see the relationship between the connected circuit type, the maximum permitted ambient temperature, the temperature class, and the effective inner reactances.

Target Group, Personnel
Responsibility for planning, assembly, commissioning, operation, maintenance, and disconnecting lies with the plant operator. The personnel must be appropriately trained and qualified in order to carry out mounting, installation, commissioning, operation, maintenance, and disconnecting of the device. The trained and qualified personnel must have read and understood the instruction manual. Prior to using the product make yourself familiar with it. Read the instruction manual carefully.

Reference to Further Documentation
Observe laws, standards, and directives applicable to the intended use and the operating location. Observe Directive 1999/92/EC in relation to hazardous areas. The corresponding datasheets, manuals, declarations of conformity, EC-type-examination certificates, certificates, and control drawings if applicable supplement this document. You can find this information under www.pepperl-fuchs.com. Refer to the relevant EC-type-examination certificate to see the relationship between the connected circuit type, the maximum permitted ambient temperature, the temperature class, and the effective inner reactances.
