Brief commissioning instruction for RaCon-D-BLE

Installing the app

1. Open the app store on your mobile device. Find the RaControl mobile app from Pepperl+Fuchs.
or
2. Scan the following QR code matching your mobile device:

Google Play Store

Apple Store

3. Follow the instructions for downloading and installing the app.

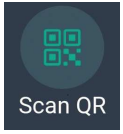

Note

Ensure that Bluetooth and GPS are enabled and the permissions of the app are not restricted by the user.

Connecting a sensor

1. Start the RaControl app.
2. Power up the sensor you want to connect. Press the icon within the app:

3. Scan the QR code on the box of the sensor
4. Confirm and accept to pair with the sensor once the message appears.

↳ RaCon-D-BLE is directly connected to the sensor.
↳ The green LED flashes.

Note

Since the sensor is installed in a public area, a password must be set.

Without a password, the sensor is connectable with the app for 5 minutes, after which the Bluetooth function is in lockdown mode and the sensor is can no longer be connected.

To reactivate the Bluetooth function, switch the sensor off and on again.

If you have entered an incorrect password more than 5 times, the Bluetooth function is locked and a password reset is required.

The password can be reset by:

1. pressing the (-) button for > 5 seconds (password reset only) or
2. pressing the (+) and (-) buttons simultaneously for > 5 seconds (factory reset)

The Bluetooth function can be permanently deactivated by pressing the (+) button for > 5 seconds. To reactivate, press the (+) button for > 5 seconds.
