**Function**

The FXLS\*.FO\* series is a range of fiber optic splice boxes designed for protection of optical fiber cable splices in hazardous areas. Up to 8 splice trays are installed inside the sturdy stainless steel enclosure.

The splice trays are according to DIN 47662 and Telecom standards, each tray can hold up to 12 fusion-type splices and is equipped with appropriate splice protection holders and FO strain relieves.

The enclosures are manufactured from electropolished AISI 316L stainless steel which provides excellent tarnish and corrosion resistance. This surface finish is ideally suited to meet hygienic requirements required for pharmaceutical and food processing plants.

All FXLS enclosures feature a return flange sealing method which prevents accumulated dirt, dust and moisture from entering the enclosure when the hinged lid is opened.

Durable materials allow the splice box to be used in ambient temperatures between -50 °C and +55 °C.

Fiber optic splice boxes are available in further enclosure materials such as GFRP.
