

## **Model Number**

RJ15-14-N-10M

## **Features**

- 15 mm inside diameter
- **Comfort series**

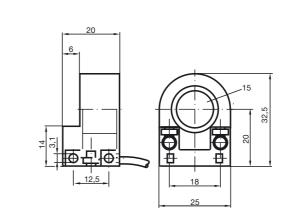

| Technical Data                  |          |                         |
|---------------------------------|----------|-------------------------|
| General specifications          |          |                         |
| Switching function              |          | Normally closed (NC)    |
| Output type                     |          | NAMUR                   |
| Installation                    |          |                         |
| Inside diameter                 |          | 15 mm                   |
| Measuring cylinder              |          | 9S20K                   |
| Diameter                        |          | 3 mm                    |
| Length                          |          | 4 mm                    |
| Nominal ratings                 |          |                         |
| Nominal voltage                 | U_       | 8 V                     |
| Operating voltage               | UB       | 5 25 V                  |
| Switching frequency             | f        | 0 1500 Hz               |
| Current consumption             |          |                         |
| Measuring plate not detected    |          | ≥3 mA                   |
| Measuring plate detected        |          | ≤ 1 mA                  |
| Ambient conditions              |          |                         |
| Ambient temperature             |          | -25 70 °C (-13 158 °F)  |
| Mechanical specifications       |          |                         |
| Connection type                 |          | cable PVC , 10 m        |
| Core cross-section              |          | 0.14 mm <sup>2</sup>    |
| Housing material                |          | PBT                     |
| Degree of protection            |          | IP67                    |
| Cable                           |          |                         |
| Bending radius                  |          | > 10 x cable diameter   |
| General information             |          |                         |
| Use in the hazardous area       |          | see instruction manuals |
| Category                        |          | 2G                      |
| Compliance with standards and d | irective | es .                    |
| Standard conformity             |          |                         |
| NAMUR                           |          | EN 60947-5-6:2000       |
|                                 |          | IEC 60947-5-6:1999      |
| Standards                       |          | EN 60947-5-2:2007       |
|                                 |          | IEC 60947-5-2:2007      |
| Approvals and certificates      |          |                         |
|                                 |          |                         |

| Equipment protection level Gb                 |   |
|---|---|
| Instruction                                   | Manual electrical apparatus for hazardous areas   |
| Device category 2G                            | for use in hazardous areas with gas, vapour and mist  |
| EC-Type Examination Certificate               | PTB 99 ATEX 2128 X  |
| CE marking                                    | <b>(€</b> 0102  |
|   |   |
| ATEX marking                                  | 🐼 II 2G Ex ia IIC T6 Gb   |
|   |   |
| Directive conformity                          | 94/9/EG   |
| Standards                                     | EN 60079-0:2009, EN 60079-11:2012   |
|   | Ignition protection "Intrinsic safety"<br>Use is restricted to the following stated conditions  |
| Appropriate type                              | BJ15N   |
| Appropriate type                              |   |
| Effective internal inductivity C <sub>i</sub> | $\leq$ 130 nF ; a cable length of 10 m is considered.   |
| Effective internal inductance L <sub>i</sub>  | $\leq$ 20 $\mu H$ ; a cable length of 10 m is considered.   |
| General                                       | The apparatus has to be operated according to the appropriate data in the data sheet<br>and in this instruction manual. The EU-type examination certificate has to be |
|   | observed. The special conditions must be adhered to!  |
| Maximum permissible ambient temperature Tamb  | The temperature ranges, according to temperature class, are given in the EC-Type  |
| anu   | Examination Certificate.  |
| Installation, commissioning                   | Laws and/or regulations and standards governing the use or intended usage goal  |
|   | must be observed. The intrinsic safety is only assured in connection with an appro-   |
|   | priate related apparatus and according to the proof of intrinsic safety.  |
|   |   |
| Maintenance                                   | No changes can be made to apparatus, which are operated in hazardous areas.   |
|   | Repairs to these apparatus are not possible.  |
| Special conditions                            |   |
|   |   |
