

# **Model Number**

### VDM100-50-SSI

Distance measurement device with three M12 x 1 connectors

# **Features**

- Measuring method PRT (Pulse Ran-• ging Technology)
- Active dynamic control ٠
- Non-contact precision measurement •
- Ultra-fast data acquisition •
- Modern lightweight design, extremely ٠ robust
- Simple programming with 4 keys and • luminous display

### **Product information**

Series VDM 100 laser distance measurement devices are designed for high distances. They have a repeat accuracy of 0.5 mm. SSI and fieldbusses are used as value interfaces. These devices are used for precise positioning of rack operating units, gantry cranes, rail-bound vehicles, elevators and other linear movable units.

#### Laser notice laser class 2

- Caution: visible and invisible laser radiation, do not look at the beam! ٠
- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable.
- Caution Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
