

CE

Model Number

NJ4-12GM40-E2-V1-3D

Features

- Comfort series
- 4 mm non-flush

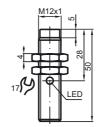

Accessories

BF 12

Mounting flange, 12 mm

Technical Data		
General specifications		
Switching element function		PNP NO
Rated operating distance	s _n	4 mm
Installation		non-flush
Output polarity		DC
Assured operating distance	sa	0 3.24 mm
Reduction factor r _{Al}		0.37
Reduction factor r _{Cu}		0.36
Reduction factor r ₃₀₄		0.74
Nominal ratings		
Operating voltage	UB	10 60 V
	f	0 2000 Hz
Hysteresis	Н	1 10 typ. 3 %
Reverse polarity protection		reverse polarity protected
Short-circuit protection		pulsing
Voltage drop	U _d	≤ 3 V
Voltage drop at I _L		40.051/
Voltage drop I _L = 100 mA, switching ment on U _d	g ele-	1.2 2.5 V
Operating current	IL	0 200 mA
No-load supply current	I ₀	≤ 15 mA
Time delay before availability	t _v	≤ 20 ms
Switching state indicator		LED, yellow
Standard conformity		
Standards		IEC / EN 60947-5-2:2004
Ambient conditions		
Ambient temperature		-25 70 °C (-13 158 °F)
Storage temperature		-40 85 °C (-40 185 °F)
Mechanical specifications		
Core cross-section		-
Housing material		Stainless steel
Sensing face		PBT
Degree of protection		IP67
General information		
Use in the hazardous area		see instruction manuals
Category		3D

ATEX 3D

Instruction

Manual electrical apparatus for hazardous areas

Device category 3D

CE marking

ATEX marking

Directive conformity

Standards

General

Installation, Comissioning

Maintenance

Specific conditions

Maximum operating current I₁

Maximum operating voltage U_{Bmax}

Maximum heating (Temperature rise)

at U_{Bmax} =30 V, I_{L} =200 mA at U_{Bmax} =30 V, I_{L} =100 mA Protection from mechanical danger

Electrostatic charging

Plug connector

for use in hazardous areas with non-conducting combustible dust

⟨Ex⟩ II 3D IP67 T 96 °C (204.8 °F) X

The Ex-significant identification is on the enclosed adhesive label

94/9/EG FN 50281-1-1

Protection via housing
Use is restricted to the following stated conditions

The apparatus has to be operated according to the appropriate data in the data sheet and in this instruction manual. The data stated in the data sheet are restricted by this operating instruction! The special conditions must be adhered to!

Laws and/or regulations and standards governing the use or intended usage goal must be observed.

The adhesive label provided must be affixed in the immediate vicinity of the sensor! The surface to which the label is applied

must be clean, flat and free from grease!

The affixed adhesive label must be readable and durable, taking account of the possibility of chemical corrosion!

No changes can be made to apparatus, which are operated in hazardous areas.

Repairs to these apparatus are not possible.

The maximum permissible load current must be restricted to the values given in the following list.

High load currents and load short-circuits are not permitted.

The maximum permissible operating voltage UBmax must be restricted to the values given in the following list. Tolerances are

dependant of the load current I_L and the max. operating voltage U_{Bmax} . Information can be taken from the following list. The maximum surface temperature at maximum ambient temperature is given

in the Ex identification of the apparatus.

26 K 18 K

The sensor must not be mechanically damaged

Electrostatic charges must be avoided on the mechanical housing components. Dangerous electrostatic charges on the mechanical housing components can be avoided by incorporating these in the equipotential bonding.

The plug connector must not be disconnected under voltage. The proximity switch is marked as follows: "DO NOT DISCON-NECT UNDER VOLTAGE!" When the plug connector is disconnected the ingress of dirt into the inner areas (i.e. the areas, which are not accessible in the plugged-in condition) must be prevented.

The plug connection can only be separated using a tool. This is achieved by using the locking protection V1-Clip (Mounting accessory from Pepperl + Fuchs).
