

**Model Number**

**UC500-F65-IE2R2-V15-Y235144**

**Features**

- Level indication
- 1 analog output, 0-20 mA current source
- 1 switch output
- Programmable by means of Interface (see accessories) and SON-PROG
- Synchronization options
- Temperature compensation

**Diagrams**

**Characteristic response curve**

Curve 1: flat surface 100 mm x 100 mm  
Curve 2: round bar, Ø 25 mm

Release date: 2016-02-16 08:26 Date of issue: 2016-02-16 235144\_eng.xml

**Technical data**

<b>General specifications</b>	
Sensing range	60 ... 500 mm
Adjustment range	60 ... 500 mm
Dead band	0 ... 60 mm
Standard target plate	10 mm x 10 mm
Transducer frequency	approx. 300 kHz
<b>Nominal ratings</b>	
Time delay before availability $t_v$	250 ms
<b>Limit data</b>	
Permissible cable length	max. 300 m
<b>Indicators/operating means</b>	
LED green	Power on
LED yellow	solid: switching state switch output flashing: misadjustment
<b>Electrical specifications</b>	
Rated operating voltage $U_e$	24 V DC
Operating voltage $U_B$	15 ... 30 V (including ripple) In supply voltage interval 15 ... 20 V sensitivity reduced to 20% ... 0%
Ripple	≤ 10 %
No-load supply current $I_0$	≤ 60 mA
<b>Input</b>	
Input type	1 Function input
Input voltage	≤ Operating voltage
Level	low level : 0 ... 3 V high level : ≥ 15 V
<b>Switching output</b>	
Output type	1 switch output PNP, NO
Default setting	60 ... 500 mm
Operating current $I_L$	≤ 300 mA , short-circuit/overload protected
Voltage drop	≤ 3 V
<b>Analog output</b>	
Output type	1 current output 0 ... 20 mA , rising ramp
Default setting	60 ... 500 mm
Linearity error	≤ 1.5 %
Load resistor	≤ 300 Ω
<b>Ambient conditions</b>	
Ambient temperature	-25 ... 70 °C (-13 ... 158 °F)
Storage temperature	-40 ... 85 °C (-40 ... 185 °F)
Shock resistance	30 g , 11 ms period
Vibration resistance	10 ... 55 Hz , Amplitude ± 1 mm
<b>Mechanical specifications</b>	
Connection type	Connector M12 x 1 , 5-pin
Degree of protection	IP65
Material	
Housing	PBT
Transducer	epoxy resin/hollow glass sphere mixture; polyurethane foam
Installation position	any position
Mass	500 g

<b>Compliance with standards and directives</b>	
Standard conformity	
Standards	EN 60947-5-2:2007 + A1:2012 IEC 60947-5-2:2007 + A1:2012 EN 60947-5-7:2003 IEC 60947-5-7:2003

<b>Approvals and certificates</b>	
UL approval	cULus Listed, General Purpose
CSA approval	cCSAus Listed, General Purpose
CCC approval	CCC approval / marking not required for products rated ≤36 V

## Accessories

### V15-G-2M-PUR

Female cordset, M12, 5-pin, PUR cable

### V15-G-2M-PVC

Female cordset, M12, 5-pin, PVC cable

### V15-W-2M-PVC

Female cordset, M12, 5-pin, PVC cable

### 3RX4000-PF

PC interface

## Application ranges

The design and function of this ultrasonic sensor make it ideal for filling level applications in small containers. The device has a switch output and an analogue output. With the switch output, a specific filling level in a tank can be signalled directly. The analogue output represents the current level as an analogue output variable.

## Assembly and connection

All components are contained in an encapsulated housing. The ultrasonic converter is in a slightly recessed position in the housing. The integrated circumferential seal allows the sensor to be used directly as a closure with integrated filling level measurement. The tank opening must have a diameter of 26 mm. It can be mounted on the tank using 2 M5 screws. The electrical connection is based on a 5-pin device connector, M12 x 1. The connections are protected against reverse polarity, short circuits and overloads. Shielded cables are recommended if there is electrical interference.

## Setting

As delivered, the switch-on and switch-off point, the measuring range limits and the averaging are fixed (see Technical data). They can subsequently be adapted to the application via SONPROG using the interface (see Accessories).

### SONPROG

The following parameters can be changed via SONPROG:

- Measuring range limits  $S_{min}$  and  $S_{max}$
- Switch-on and switch-off points (A, E)
- Blind zone
- Averaging

Special programming options are available on request.

## Operation

The filling level of a container is detected within the detection range. When the filling level reaches the switch-on or switch-off point (E or A), the switch output reacts according to its setting. The switching statuses of the switch output are signalled by the yellow LEDs. If the level is between the switching points A and E, the output is active.

Filling levels between the measuring range limits ( $S_{min}$ ,  $S_{max}$ ) are displayed in the form of an analogue output signal at the analogue output. The analogue output delivers its minimum value at filling level  $S_{min}$  and its maximum value at filling level  $S_{max}$ . The characteristic between the two measuring range limits is linear.

Objects in the blind zone cause false signals. Install in such a way that the filling level cannot enter the blind zone.

### Function input XI

The sensor is placed in standby mode by connecting a low level at the function input XI (blocked release). The sensor then performs no measurements. The outputs retain the most recent status. As soon as function input XI is disconnected from the low level or a high level is connected (release), the sensor resumes its normal function.

The function input XI can be used during operation for the synchronisation of multiple sensors. This can be done by connecting external signals, e.g. from a controller (external synchronisation) or by simply connecting the function inputs of all sensors to be synchronised (internal synchronisation).
