

## Resistance Thermometer for Cold Junction Compensation

### H-CJC-SC-8

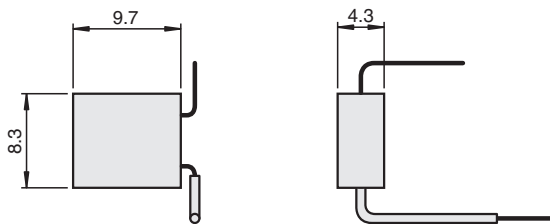

- For Cold Junction Compensation of HiD2082
- For H-System Termination Boards
- For terminal blocks with screw terminals
- Packaging unit: 8 pieces

Resistance thermometer for cold junction compensation for H-System termination boards

## Function

The resistance thermometer is suitable for H-System applications. The wires of the resistance thermometer are bended for usage of terminal blocks with screw terminals on the field side of the Termination Board. The resistance thermometer is available as an optional accessory.

## Dimensions

## Technical Data

<b>General specifications</b>	
Type	resistance thermometer (RTD) Cu109
<b>Electrical specifications</b>	
Resistor	109 $\Omega$
<b>Mechanical specifications</b>	
Mass	approx. 3 g
Dimensions	8.3 x 9.7 x 4.3 mm (0.33 x 0.38 x 0.17 inch)
