Features

- · 4 segments, redundant, individual modules per segment
- · Customized for Yokogawa, ALF 111
- High-power trunk: Live work on devices in any hazardous area
- · Optimized for size and quality, low heat dissipation
- For FOUNDATION Fieldbus H1
- · Optional advanced diagnostics
- · Passive impedance for high reliability
- · Mountable in any direction
- Installation in Zone 2/Div. 2
- Supports Ex ic voltage limitation

Function

The FieldConnex[®] High-Density Power Hub is a modular fieldbus power supply for four segments, fulfilling the needs for all general applications. It supports explosion protection e.g. the High-Power Trunk for longest cable run and highest device count. The Power Hub supports optional Advanced Diagnostics for fast fieldbus commissioning and online monitoring.

The motherboard is the wiring interface with connectors for direct DCS hook-up via the AKB 336 system cable. Sockets for all modules enable simple installation and replacement without tools. For power redundancy with seamless transfer, pairs of modules feed each segment.

Availability and a long service life is achieved through: only one passive impedance filter per segment, optimized design for low power dissipation, high-availability fieldbus termination and plug-in connectors with retaining screws. Any mounting direction allows optimized and space-saving cabinet layout.

Assembly

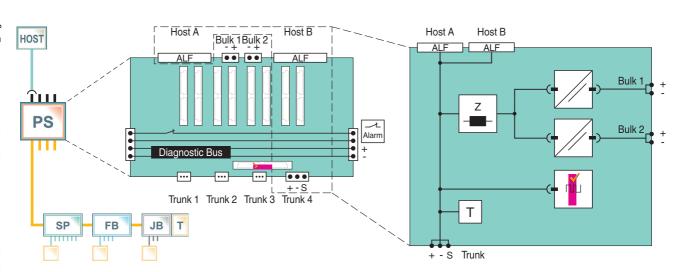

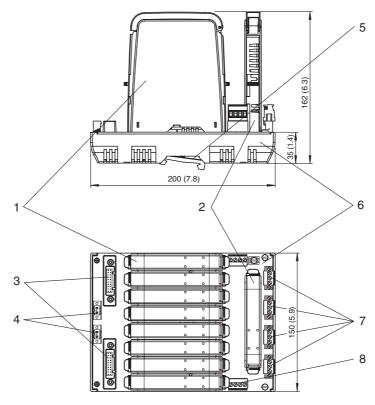

Connection

Supply						
Connection	redundant					
Rated voltage	U _n 19.2 35 V SELV/PELV					
Rated current	I _n 16 A					
Power dissipation	typ. 0.39 W per segment					
Fieldbus interface	typ. 0.09 W per segment					
Number of segments						
Redundant	4					
Host-side	redundant Yokogawa ALF111 with AKB336 interface cables					
Terminating resistor	100 Ω integrated					
Indicators/operating means						
Fault signal	VFC alarm output via connectors					
Electrical isolation						
Fieldbus segment/Fieldbus seg	ment functional insulation acc. to IEC 62103, rated insulation voltage 50 V _{eff}					
Fieldbus segment/Supply	functional insulation acc. to IEC 62103, rated insulation voltage 250 V _{eff}					
Directive conformity						
Electromagnetic compatibility						
Directive 2014/30/EU	EN 61326-1:2013

Dimensions

All dimensions in millimeters and inches (values in brackets) and without tolerance indication.

Description:

- 1 Power Supply Modules, see separate data sheet
- 2 Diagnostic Module, see separate data sheets
- 3 Redundant Yokogawa AKB336 system cable socket
- 4 Connections for bulk power supply, redundant
- 5 Mounting slot for DIN rail
- 6 Motherboard
- 7 Connections for fieldbus trunk
- 8 Connections for alarm voltage free contact and diagnostic bus Diagnostic link cable, optional accessory

Diagnostic module selection

The following diagnostic modules are compatible with this motherboard.

Type code	Description		
HD2-DM-B	Diagnostic Module, basic version		
HD2-DM-A	Diagnostic Module, advanced version		
HD2-DM-A.RO	Diagnostic Module, advanced version, relay output		

The stationary and mobile Advanced Diagnostic Module (ADM) and related components provide measurement tools for the fieldbus physical layer. The ADM monitors many quality indicating values of the fieldbus physical layer. An expert system, which is included, analyzes the values and issues easy to understand messages indicating cause and remedy. The ADM is recommended for:

- Faster commissioning and plant start-up: Installation issues are known and corrected before loop check commences
- Reliable operation through online monitoring: The quality of the physical layer and installation is monitored making fieldbus a manageable asset
- Efficient troubleshooting: An expert system guides the user through issues and faults in the fieldbus installation

Many other tools are included that enhance fieldbus installation and upkeep. Please see datasheet on HD2-DM-A.

Accessories

Type code	Description	
ACC-MB-HDC	Diagnostic link cable, length 6 cm
