

Laser triangulation sensor with background suppression, ultra-small design with M3 mounting, 50 mm sensing range, light on, PNP output, 200 mm fixed cable with plug M8, 3-pin

#### **Function**

The R3 series nano sensor has been developed for a broad range of applications. It offers excellent durability and is exceptionally easy to install. The housing is compact and, with its 45° cable outlet, can be installed in the smallest spaces. New functional principles and functionality open up a range of new options. The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor.

#### Dimensions

# **Technical Data**

| General specifications |                                      |  |
|------------------------|--------------------------------------|--|
| Detection range        | 7 50 mm                              |  |
| Reference target       | standard white, 100 mm x 100 mm      |  |
| Light source           | laser diode                          |  |
| Light type             | modulated visible red light , 680 nm |  |

#### **Safety Information**

Laser Class 1 Information The irradiation can lead to irritation especially in a dark environment. Do not point at people! Maintenance and repairs should only be carried out by authorized service personnel!

Attach the device so that the warning is clearly visible and readable. The warning accompanies the device and should be attached in immediate proximity to the device. Caution – Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
