

Solenoid Driver

KFD2-SLD-Ex2.1245-Y1

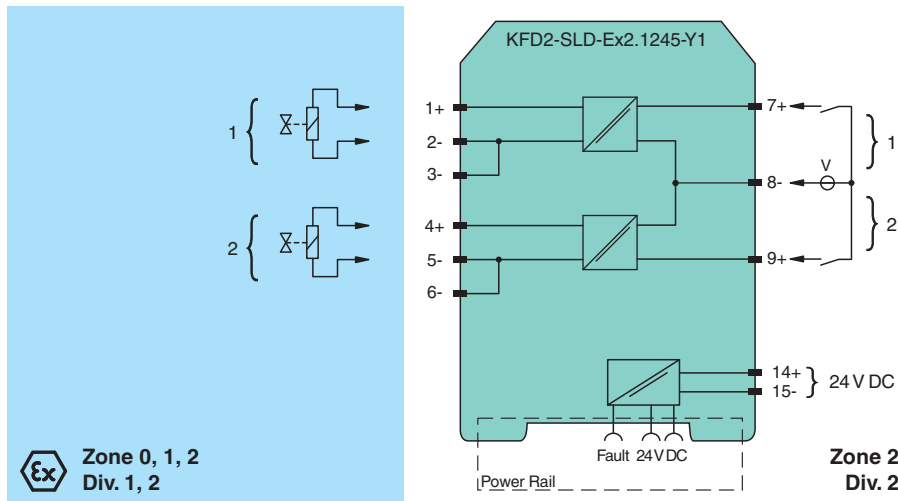

- 2-channel isolated barrier
- 24 V DC supply (bus or loop powered)
- Output 45 mA at 12 V DC
- Line fault transparency (LFT)
- Test pulse immunity

Function

This isolated barrier is used for intrinsic safety applications. The device supplies power to solenoids, LEDs and audible alarms located in the explosion-hazardous area. The device is controlled with a loop powered signal or a bus powered logic signal. The device is immune to the test pulses of various control systems. The device simulates a minimum load at the input. The minimum load is set via the mode of operation. In the loop-powered mode of operation, a minimum load of 20 mA is simulated. In the bus-powered mode of operation, a minimum load of 5 mA is simulated. The line fault transparency function can display a line fault in the field by a change in impedance at the switching input of the solenoid driver. A fault is indicated by LEDs and output via a fault indication output.

Connection

Technical Data

General specifications	
Signal type	Digital Output
Supply	
Connection	Power Rail or terminals 14+, 15-
Rated voltage	U_r 18 ... 30 V DC
Power consumption	max. 3.5 W at 45 mA output current
Input	
Connection side	control side
Connection	terminals 7, 8, 9
Test pulse length	max. 2 ms from DO card
