- For cleaning the code rail
- Delivered with fixing screws
- Accessory set for guide trolley WCS3-GT09-P1-O

Cleaning brushes

Function

The WCS3 guide trolley for outdoor use (WCS3-GT09-P1-O) is provided with mounting holes for fastening cleaning brushes. The brushes are used to mechanically clean the code rail during operation. The use of cleaning brushes is required if a heavy degree of pollution of the code rail causes the code holes to no longer be reliably detected by the read head. In this case, read errors or error messages from the read head may occur. For plants with extreme ambient conditions, the use of a stainless steel code rail is also recommended. The cleaning brushes are optional and can be retrofitted if required.
