Corded 1-D and 2-D Handheld Reader for Zone 1/21

Function

IDM-Z1-x60-D-* corded handheld readers scan 1-D and 2-D codes in Zone 1/21 hazardous locations or safe areas. They are optimized for use with Pepperl+Fuchs VisuNet HMI components. 1-D models read all common one-dimensional barcode types, with an option available to read stacked codes. The 2-D model reads one-dimensional barcodes and stacked codes, as well as two-dimensional codes such as Data Matrix and QR codes. SK-IDM-Z1-*... supply modules enable stand-alone applications and data communication with the host PC or PLC in the safe area via RS-232/RS-422 or USB communication. A variety of cables are available as accessories for connectivity to VisuNet HMI components.
