

Software

eCONFIG

- Helps reduce fragmentation among OEMs
- Provides a standardized way to configure and deploy device settings
- Access new features without using the UEM console or agent application
- Zero-day support for all OEM features from all UEM vendors
- Android™ application
- Available at Google Play

Configuration application for Android™ smartphones

Function

eCONFIG is an application developed by the Pepperl+Fuchs ecom brand and published on Google Play. The app supports managed app configurations for all available configurations. An organization can whitelist the eCONFIG app for its EMM, configure relevant managed app settings, and push them to its devices. The eCONFIG app retrieves the managed app configurations and implements them on the device.
