

Software

eRESPOND

- Assign a hardware key to answer calls
- Answer calls with a single hardware key press
- Android™ application
- Available at Google Play

Application to make it easier to answer calls

Function

Extend the convenience of answering calls.

- Especially in harsh environments, it can be difficult to answer calls when you have to swipe to pick up. The standard method of answering calls
- often requires the use of both hands,
 - is dangerous while standing on a ladder,
 - or is difficult to perform while wearing gloves.

With eRESPOND, you can now assign a hardware key to pick up calls with a single hardware key press. Respond to the incoming call with ecom custom buttons.
