

# Float Switch

- Switch element: float switch with initiator, mercury-free
- Electrical connections in acc. with NAMUR for hazardous area
- Limit value detection for fluids
- Sleeve design: small diameter, mounting through G1 tap hole possible
- Ball design: high buoyancy

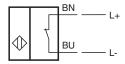

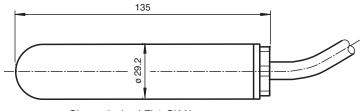

## **Function**

The initiator (NC contact) is integrated in a PP float and is activated in the event of deviations from the horizontal position. The switching ball in the float, which moves along an axis, activates the switching event in the initiator inductively. The switch output provided by the initiator is a switch signal in accordance with EN 60947-5-6 (NAMUR).

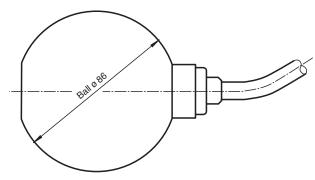

# **Application**

#### **Dimensions**

Sleeve design LFL1-CK-N

Ball design LFL1-BK-N

#### Technical Data **General specifications** Proximity switch with operation ball Construction type LFL1-\*\*-N Series Supply Rated voltage $U_r$ $8.2 V \pm 2 V$ < 1.0 mA unswitched (de-energized at the bottom), > 2.2 mA switched (floated up at the top) Current consumption Reverse polarity protection yes Output Connection NAMUR acc. to EN 60947-5-6, 2-wire **Directive conformity** Electromagnetic compatibility Directive 2014/30/EU EN 60947-5-2:2007+A1:2012 Conformity Degree of protection IEC 60529:2001 Function and system design Equipment architecture A measuring system consists of a float switch LFL1-\*\*-N and a transformer isolated barrier e. g. KFD2-SR2-Ex1.W. Operating conditions Installation conditions range of application and minimum length between mounting and float: - PVC version: ≥ 50 mm (2 inch), preferred for water - PUR version: ≥ 100 mm (4 inch), preferred for fuels, heating oils, oily fluids - CSM/CM version: ≥ 100 mm (4 inch), preferred for many acids and lyes Installation instructions mounting: The float switch is mounted either from sidewards through a cable gland ≥ G1A into the vessel or - by means of a counter weight or rods (e. g. float switch combination) from the top. The pivot of the cable should always be horizontal. Process conditions sleeve design: $\leq$ 3 bar at 20 °C (68 °F) ball design: $\leq$ 2 bar at 20 °C (68 °F) Process pressure (static pressure) sleeve design: $\geq 0.8 \text{ g/cm}^3$ ball design: $\geq 0.6 \text{ g/cm}^3$ Density **Ambient conditions** -20 ... 70 °C (-4 ... 158 °F) Ambient temperature Storage temperature -25 ... 70 °C (-13 ... 158 °F) Altitude ≤ 2000 m above MSL Mechanical specifications IP68 Degree of protection Data for application in connection with hazardous areas

Accessories

Designation

- LFL-Z231, counter nut, G1A, PVC
- LFL-Z32, counter weight, grey cast iron with plastic coating (Polycarbonate)
- LFL-Z33, counter weight, grey cast iron with ECTFE coating (Halar)
- LFL-Z131, gland screw connection G1A, PVC
- LFL-Z132, gland screw connection G1A, brass
- LFL-Z161, gland screw connection G2A, PVC
- LFL-Z431, gland screw connection 1 NPT, PVC
- LFL-Z461, gland screw connection 2 NPT, PVC

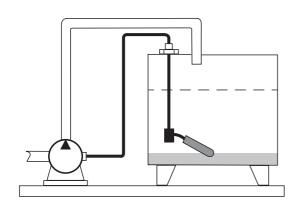

# Safety Information

Users should take appropriate precautions when using accessories in explosion-hazardous areas. The counter weights LFL-Z32 and LFL-Z33 must not be used in explosion-hazardous area.

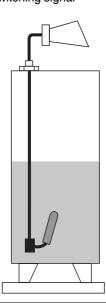

# **Type Code**

This overview does not mark options which are mutually exclusive.

# **Mounting**

Mount the float switch in the following way:

- Insert the float switch into the tank through a tapped hole G1A.
- Srcew the float switch with the gland screw connection G1A.
- If it is installed from above, use the counter weight LFL-Z32 or LFL-Z33 for mounting.

0

The fulcrum of the cable should always be horizontal.

The cable length between the fixture and the floating body is dependent on the cable type.

When using the counter weight, place an extra strain relief (e. g. a knot in the cable) behind the gland screw connection – on the outside of the tank.
